

# Antonio Carnovale

Automation specialist (n8n, Airtable, chatbots)

Turin, Italy | ty@cautomations.com | cautomations.com | github.com/carnovautomations-dev

## Profile

---

I build automations for small businesses: workflows that answer leads, alert the team and follow up automatically. I come from the field (window and door installation), so I design around how small trade businesses actually work. Independent, based in Turin, available for remote work.

## Projects

---

### **Lead Follow-Up Automation for window installers (n8n, Airtable, Slack, SMTP) - [github.com/carnovautomations-dev/n8n-lead-followup-automation](https://github.com/carnovautomations-dev/n8n-lead-followup-automation)**

- Webhook with header authentication, input validation and lead scoring (0-100) written in JavaScript.
- Saves leads to Airtable, alerts Slack, sends a confirmation email, then follows up at 24h and 72h if the lead is still uncontacted.
- Separate error workflow, sanitized export and setup README so others can install it.

### **Miniad (web app, live demo and open code on GitHub)**

- Built and published a small browser-based tool: [carnovautomations-dev.github.io/miniad](https://carnovautomations-dev.github.io/miniad)

### **Dental clinic chatbot (n8n, Airtable, Typebot)**

- Chatbot flow that collects patient requests and stores them in Airtable through n8n.

### **RAL calculator (web tool, JavaScript)**

- Calculator that turns an Italian gross annual salary (RAL) into an estimate of net pay.

## Experience

---

### **Independent window and door installer / salesperson, Turin | VAT number since Dec 2025**

- Ran jobs and dealt directly with customers, which is where I learned how leads are lost.

### **Construction and installation work | earlier**

- Hands-on site experience in window and door installation.

## Skills

---

**Automation:** n8n, webhooks, Airtable, Slack, SMTP / Brevo, error handling

**Code:** JavaScript

**Chatbots:** Typebot

## Education

---

High school diploma (Diploma superiore) | ITIS Giulio Natta, Turin, Graphic Design and Communication track, 2023

## Languages

---

Italian (native), English (fluent)
